AN/PVS-14 NIGHT VISION MONOCULAR

The AN/PVS-14 night vision monocular is now the primary NVD issued to US War Fighters in all operational theaters world-wide. Based on the proven multi-purpose concept, the PVS-14 has distinguished itself as a reliable and effective force multiplier, providing our ground combat troops with the most superior night ops capability in the history of modern warfare. The monocular can be deployed as a hand-held pocket scope, mounted to a weapon in combination with an infrared laser or red dot sight, mounted to a helmet or attached to our iTellegent™ iPhone & iPad adapters to record training or actual combat operations in the field. All of our War Lantern-PVS-14 monoculars are built in-house utilizing American made optics and housing assemblies. We offer both full US specification Generation 3 auto-gated systems that include the new L3 Chrome™ White Phosphor technology as well as versions for export.

Ships With: Monocular, Soft Carrying Case, Eye Cup, Objective Lens Cap, Demist Shield, Sacrificial Window, Head Mount, Transfer Arm, Brow Pads, Shoulder Strap, Lanyard, (1) AA Battery, Lens Tissue and Ops Manual.

*Helmet Mount & Helmet Not Included

Export of the commodities described herein is strictly prohibited without a valid export license issued by the U.S. Department of State, Office Defense Trade Controls, prescribed in the International Traffic in Arms Regulations (ITAR), Title 22, Code of Federal Regulations, Parts 120-130.
